Mr. Richard L. Beam, Director
Office of Pipeline Safety
Research and Special Programs Administration
U.S. Department of Transportation
400 Seventh Street, S. W.
Washington, D.C. 20590

Dear Dick:

Here are two copies of API's Aboveground Storage Tank Survey. You will note that some 9,197 tanks are attributed to transportation. These are pipeline tanks, of which almost all are breakout tanks used in pipeline operations. I hope this report is helpful to you. Please give me or Dudley Orr a call if you have any questions.

Very truly yours,

V. Kenneth Leonard
